

Anand M

Product Designer | Design Engineer

Bangalore, India | +91 9895103740 | anand97nalanda@gmail.com | [LinkedIn](#) | [Portfolio](#)

Summary

Product Designer and Design Engineer with 4+ years on B2B SaaS and AI products. Turns dense, high-volume workflows into interfaces people read at a glance, then ships them in React, TypeScript and Next.js. Research-led, measured in time saved and adoption.

Professional Experience

Product Designer & Design Engineer at GTSS

Remote | Sep 2025 – Present

Global Tech Service Solutions builds hiring software: [OFM Jobs](#), a recruitment platform matching agencies with vetted candidates, and [Jobsly](#), an AI-native recruiting platform run by an AI hiring agent.

- **Kanban Pipeline & AI Scoring:** The product ended at “message sent”: after first contact, hiring left for WhatsApp. Designed a Kanban pipeline with employer-defined stages, messaging on each candidate card, and an AI match score that opens into its reasoning; AI ranks, a drag always wins. Hundreds of applicants became a ranked shortlist; hiring now happens on OFM Jobs, not in an inbox.
- **Skill Tests, proof before apply:** Moved skill proof to the front of the funnel: employers set required tests and pass marks when posting; Apply stays locked until the candidate clears the bar. Designed and shipped five built-in, auto-graded tests (English, AI-scored verbal, listening, typing with live WPM, internet speed); verified scores carry across jobs. 142 applications became 38, all verified; zero skill surprises reached an interview.
- **Product Websites:** Designed and built the [Jobsly](#) website end to end in Next.js, TypeScript and Tailwind CSS, with animated product demos for all six pipeline stages and programmatic SEO templates; built the [OFM Jobs](#) marketing site with an interactive 3D globe (Framer Motion, GSAP).

Product Design Consultant at Stealth Startup

Remote | Nov 2024 – Aug 2025

Designing AI technology for a more sustainable and equitable maritime industry; details under NDA.

Lead Designer at StapleAI

Singapore, Remote | Nov 2023 – Nov 2024

AI-powered OCR for document processing and data extraction, backed by \$4M+ from Wavemakers Ventures.

- **Staple Chat, AI data analysis:** Led design of a natural-language analytics product. 23 interviews with finance, ops and compliance users reframed “a better dashboard” into conversational querying, so chat became the whole interface: auditable reasoning on every answer, inline charts, a connected-data panel, and suggestion chips for the blank canvas. Time-to-insight fell from 15 minutes to 2; 67% of queries now come from non-technical users.
- **Staple Tables, extraction review:** Rebuilt review screens for 150+ daily reviewers on 10,000+ documents a month: colour-blind-safe field grouping, bounding boxes tracing each value to its source, one-click header remapping. Error correction down 50%, throughput up 3x, support tickets down 73%.

Associate Designer at WareIQ (YC S20)

Bangalore, India | Feb 2022 – Nov 2023

AI-driven logistics platform streamlining fulfilment and delivery for e-commerce brands in India.

- **Returns & Inventory LogIQ:** Added a self-service returns portal to the order tracking page; led design of the InventoryLogIQ web app and site, with AI stock-transfer recommendations to cut inventory loss.

Skills

- **Design:** Product Design, UX/UI Design, Interaction Design, User Research, Design Systems, Prototyping, Accessibility, Developer Handoff, Figma, Sketch, Illustrator, Photoshop
- **Engineering:** React, Next.js, TypeScript, JavaScript, HTML/CSS, Tailwind CSS, Framer Motion, GSAP, SVG Animation, Git, Claude Code
